

Throughput Technologies

Company Overview

NEED SOMETHING CONNECTED?

For industrial data
communication systems

Talk to Us!

- ❖ Networking Products
- ❖ Protocol Interfacing and Gateways / Converters
- ❖ Linking to Remote Equipment
- ❖ Wireless Solutions
- ❖ Interfacing for Legacy Solutions
- ❖ IIoT Solutions
- ❖ CyberSecurity Solutions

**Reliability & Workability
in Connectivity. All That Matters.**

linking dissimilar automation products seamlessly

Specialising in marketing worldclass third party products since 1997, both to allow and enhance industrial data communication performance of SCADA, PLC and DCS and intelligent instrumentation systems.

The solutions offered assist in reducing risk, both to system engineering companies and the end user, of the life of their control & automation projects. Our branded products are not only cutting-edge technology giving the customer real solutions that work, they are confidently of the highest quality backed by our principals' guarantees that extend as much as five years.

Armed with decades of experience and working knowledge of the industry and a distinct knack to solve industrial data communication problems, we are your first and last port of call.

Talk to us. We will get you connected!
